

Alcohol Clinical Pharmacology

National Institute on Alcohol Abuse and Alcoholism

We are recruiting a postdoctoral fellow to conduct research in the Section on Human Psychopharmacology in the intramural program of the National Institute on Alcohol Abuse and Alcoholism (NIAAA), one of the National Institutes of Health (NIH), Department of Health and Human Services (DHHS). The laboratory is located within the Mark O. Hatfield Clinical Research Center on the main NIH intramural campus in Bethesda, MD.

The research conducted by the Section is focused on: (1) evaluating genetic and environmental factors influencing the clinical pharmacology of alcohol and the neurobiology of addiction, and (2) developing and applying human laboratory paradigms to screen novel potential medications for the treatment of alcoholism. For more information, please visit our webpage (<http://1.usa.gov/18lAB9u>).

Candidates with a Ph.D., M.D., or Pharm.D./Ph.D. in clinical pharmacology, psychology, neuroscience, neuroimaging, genetics, or related field, are encouraged to apply. Strong verbal and written communication skills are essential. Candidates should have less than 5 years of post-doctoral training. Salary will be set commensurate with experience and accomplishments as well as NIH guidelines.

To apply, candidates must submit a letter of application, along with CV including list of publications and three letters of recommendation, to Dr. Vijay Ramchandani at vijayr@mail.nih.gov.

Women and minorities are strongly encouraged to apply. The NIH is dedicated to building a diverse community in its training and employment programs.
